

# 2023 Sustainable Agents

Atlas Van Lines' Certified Sustainable Agents understand that business practices must be executed with our planet and communities in mind. These are full-service movers who have completed a baseline of tasks to further green efforts in five areas, including materials management, transportation, business administration, facilities and community.

Each year, Atlas honors agents who are committed to the well-being of our people, company and environment through the application of sustainable practices. These admirable agents deploy mindfulness as they help people **go news places®** every day.
